# Software Developer

**Location: Remote / On-site - Abuja, Nigeria**
**Job Type: Full-Time / Part-Time**
**Reports To: Lead Developer / CTO**

## 1. Background

Instant Health Service is a company that is committed to transforming Healthcare delivery through an innovative X-ray diagnostic intelligence platform that enables real-time reading and reporting of critical health data. At Instant Health, we simplify health service provision through digitization and automation. Our multidisciplinary team comprises public health specialists, data scientists, and skilled software developers.

## 2. Objectives

The objective of this TOR is to engage a qualified software developer to design, develop, test, and maintain software solutions that meet the organization's requirements.

## 3. Job Summary:

We are looking for a talented and detail-oriented Software Developer to join our team. The ideal candidate will be responsible for designing, coding, testing, and deploying scalable software solutions. You will work closely with other developers, designers, and product managers to deliver high-quality products that meet user needs.

### Key Responsibilities:

- Design, develop, and maintain web/mobile/desktop applications based on business requirements.
- Write clean, scalable, and efficient code following best practices.
- Debug and resolve technical issues and bugs.
- Collaborate with cross-functional teams, including UI/UX designers, QA testers, and product managers.
- Participate in code reviews and contribute to the continuous improvement of software engineering practices.
- Write and maintain technical documentation.
- Ensure software is optimized for performance, security, and scalability.
- Participate in remote and field Training.

### Requirements and Qualifications:

- Bachelor's degree in computer science or a related field (or equivalent experience).
- Proven experience in software development with 2-5 years of practical experience.
- Proficiency in one or more programming languages such as JavaScript, Python, Java.
- Experience with frameworks and libraries such as React, Angular, Django etc
- Knowledge of database systems (e.g., MySQL, PostgreSQL, MongoDB).
- Familiarity with version control systems (e.g., Git).
- Strong understanding of the software development life cycle (SDLC).
- Excellent problem-solving and analytical skills.
- Good communication and teamwork abilities.

### Preferred Skills (Optional):

- Experience with cloud platforms (AWS, Azure, or Google Cloud).
- Understanding of DevOps practices and CI/CD pipelines.
- Knowledge of Agile/Scrum methodologies.
- Experience with containerization (e.g., Docker, Kubernetes).

### Work Conditions

- Location: Remote/On-site at Abuja as required.
- Working hours: 9 AM – 5 PM, Monday to Friday
- Equipment and software tools will be provided by the developer/Instant Health Services.

### Benefits:

- Competitive salary and performance bonuses
- Flexible working hours / Remote work option
